TM 5-4320-218-20P, 11 April 1968, is changed as follows:

Page 13, Figure 8, Item 1. Change Reference No. "51243" to read "5486N". Change FSCM "25567" to 76700".

Page 17, Figure 16, Item 8, Change NSN from "2920-278-6104" to "2920-00-279-6104".

Page 27, Figure 21, Item 1, Add P/N MS51864-104-14" and FSCM "96906". Change SMR Code from "X20" to "PA".

Page 31, NSN 5307-268-5751. Figure and Item No. blank. Add P/N MS51864-104-12 and FSCM "96906", change SMR code from "0" to "PA".

Page 31, NSN 5307-268-5752, Figure and Item No. blank. Add P/N "MS51864-104-14" and FSCM "96906", Change SMR code "0" to "PA".

Page 31, Figure 22, Item 46, Add P/N "MS51864-104-12" and FSCM "96906". Change SMR code from "0" to "PA".

Page 31, Figure 23, Item 10, Add P/N "MS51864-104-12" and FSCM "96906". Change SMR code from "0" to "PA".

By Order of the Secretary of the Army:

**JOHN A. WICKHAM, JR.**  
*General, United States Army*  
*Chief of Staff*

Official:

**R. L. DILWORTH**  
*Brigadier General, United States Army*  
*The Adjutant General*

## DISTRIBUTION:

To be distributed in accordance with DA Form 12-25A, Organizational Maintenance requirements for Pump, Centrifugal, Petroleum, Trailer Mounted, 350GPM, 275 FT Head, 4 IN (0412-MVG4D, 04A12B-MVG4D) (TM 5-4320-218 Series)

Change in force: C 2

**\*TM 5-4320-218-20P**

**C 2**

Change }

(GORMAN-RUPP MODEL 04A12B-MVG4D) FSN 4320-069-8494**

Current as of 19 January 1971

TM 5-4320-218-20P, 11 April 1968, is changed as follows:

Cover and content page are changed as shown above.

Page iv, paragraph 3a(3), Code R is superseded as follows:

*Code*

*Explanation*

R Applied to repair parts (assemblies and components) which are considered economically repairable at direct and general support maintenance levels. When the

*Explanation*

maintenance capability to repair these items does not exist, they are normally disposed of at the GS level. When supply considerations dictate, some of these repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis.

Page vi, Section II, Group 0106, line 5, change FSN 5330-599-1285 to read 2940-679-3595.

Page 5, Section IV, is changed as follows:

\*This change supersedes C 1, 13 February 1970.

By Order of the Secretary of the Army:

Official:

KENNETH G. WICKHAM,  
*Major General, United States Army,*  
*The Adjutant General.*

W. C. WESTMORELAND,  
*General, United States Army,*  
*Chief of Staff.*

Distribution:

To be distributed in accordance with DA Form 12-25, Section I (qty rqr block No. 246) Organizational Maintenance requirements for Pumps, Centrifugal, Petroleum.

## SECTION I

### INTRODUCTION

#### 1. Scope

This manual lists repair parts required for the performance of organizational maintenance of the pump.

#### 2. General

a. The Repair Parts List is arranged as follows:

(1) Individual parts and major assemblies are listed alphabetically by item name within the numbered functional groups.

(2) Assembly components and subassemblies are indented and listed alphabetically by item name under major assemblies.

b. This Repair Parts List is divided into the following sections:

(1) *Prescribed Load Allowance (PLA)*—Section II. A consolidated listing of repair parts quantitatively allocated for initial stockage at the organizational level. *This is a mandatory stockage allowance.*

(2) *Special Tools, Test and Support Equipment*—Section III. None required for this equipment.

(3) *Repair Parts*—Section IV. A list of repair parts authorized for the performance of maintenance at the organizational level.

#### 3. Explanation of Columns

The following provides an explanation of columns in the tabular lists in sections II, III, and IV.

a. *Source, Maintenance and Recoverability Codes (SMR).*

(1) Source Code, indicates the selection status and source for the listed item. Source codes are:

Code  
P

*Explanation*  
Applied to repair parts which are stocked in or supplied from DSA/GSA or Army supply system, and authorized for use at indicated maintenance categories.

M

Applied to repair parts which are not procured or stocked but are to be manufactured at indicated maintenance categories.

A

Applied to assemblies which are not procured or stocked as such but are made up of two or more units, each of which carry individual stock numbers and descriptions and are procured and stocked and can be assembled by units at indicated maintenance categories.

X

Applied to parts and assemblies which are not procured or stocked, the mortality of which is normally below that of the applicable end item and the failure of which should result in retirement of the end item from the supply system.

X1

Applied to repair parts which are not procured or stocked, the requirement for which will be supplied by the use of the next higher assembly or components.

X2

Applied to repair parts which are not stocked. The indicated maintenance category requiring such repair parts will attempt to obtain them through cannibalization; if not obtainable through cannibalization, such repair parts will be requisitioned with supporting justification through normal supply channels.

C

Applied to repair parts authorized for local procurements. If not obtainable from local procurement, such repair parts will be requisitioned through normal supply channels with a supporting statement of nonavailability from local procurement.

G

Applied to major assemblies that are procured with PEMA (Procurement Equipment Missile Army) funds for initial issue only to be used as exchange assemblies at DSU and GSU maintenance level. These assemblies will not be stocked above DSU and GSU or returned to depot supply level.

*Note.* Source code is not shown on common hardware items known to be readily available in Army supply channels and through local procurement.

(2) Maintenance Code, indicates the lowest category of maintenance authorized to install the listed item. The maintenance level code is:

Code	Explanation
O	Organizational Maintenance

(3) Recoverability Code, indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

Code	Explanation
R	Applied to repair parts and assemblies which are economically repairable at DSU and GSU activities and normally are furnished by supply on an exchange basis.
T	Applied to high dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance activities.
U	Applied to repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value reusable casings or castings.

(4) This column also lists, below the SMR code, an index number for each item in ascending numerical sequence, which is used to locate items in the publication when the Federal stock number and/or reference number is known.

b. *Federal Stock Number*: This column indicates the Federal stock number for the item.

c. *Description*: This column indicates the Federal item name and any additional description of the item required. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufactures in parentheses. Repair parts quantities included in the kits, sets, and assemblies are shown in front of the repair part name. Material required for manufacture or fabrication is identified.

d. *Unit of Issue*: This column indicates the unit used as a basis for issue, e.g., ea, pr, ft, yd, etc.

e. *Quantity Incorporated in Unit Pack*: This column indicates the actual quantity contained in the unit pack.

f. *Quantity Incorporated in Unit*: This

column indicates the quantity of the item used in the functional group.

g. *Fifteen-Day Organizational Maintenance Allowance, Column (4) of Section II and Column (7) of Section III and IV.*

(1) The allowance columns are divided into four subcolumns. Indicated in each subcolumn is the total quantity of items authorized for the number of equipments supported. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units and organizations authorized additional prescribed loads will multiply the number of prescribed loads authorized by the quantity of repair parts reflected in the appropriate density column applicable to the number of items supported to obtain the total quantity of repair parts authorized.

(3) Organizational units providing maintenance for more than 100 of these equipments shall determine the total quantity of parts required by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-100 allowance column. Example, authorized allowance for 51-100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.

(4) Subsequent changes to allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendation should be forwarded to U.S. Army Mobility Equipment Command for exception or revision to the allowance list. Revisions to the range of items authorized will be made by this Command based upon engineering experience, demand data, or TAERS information.

h. *Illustration, Column (8)*. This column is divided as follows:

(1) *Figure Number Column (8a)*. Indicates the figure number of the illustration in which the item is shown.

(2) *Item Number, Column (8b)*. Indicates the callout number used to reference the item in the illustration.

#### 4. Special Information

a. Identifications of the usable on codes included in column (2) of Section II and column (3) of Sections III and IV of this publication are:

Code	Used On
A	MODEL 04A12B-MVG4D only
B	MODEL 04A12-MVG4D only

b. Repair parts not symbolized are applicable to all models and serial number ranges covered in this publication.

c. Repair parts mortality has been based on 4,000 hours of operation per year.

d. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.

e. The following publications pertain to the pump and its components:

TM 5-4320-218-15 Operator, organizational, field and depot maintenance manual.

#### 5. How to Locate Repair Parts

a. When Federal stock number or reference number is unknown:

(1) *First*. Using the table of contents, determine the functional group within which the repair part belongs.

(2) *Second*. Find the illustration covering the functional group to which the repair part belongs.

(3) *Third*. Identify the repair part on the illustration, and note the illustration figure and item number of the repair part.

(4) *Fourth*. Using the repair parts listing, find the functional group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When Federal stock number or reference number is known:

(1) *First*. Using the index of Federal

stock numbers and reference numbers, find the pertinent Federal stock number or reference number. This index is in ascending alphanumeric sequence cross-referenced to an index number.

(2) *Second*. Using the repair part listing, find the index number referenced in the index of Federal stock numbers and reference numbers.

#### 6. Abbreviations

Abbreviations	Explanation
No. ....	number
mtg ....	mounting
w/ ....	with
thk ....	thick (ness)
in. ....	inch (s)
std ....	standard (s)
thd ....	thread (s) (ed)
dia ....	diameter (s)
lg ....	length (long)
od ....	outside diameter (s)
id ....	inside diameter (s)
lh ....	left hand
rh ....	right hand

#### 7. Federal Supply Codes for Manufacturers

Code	Manufacturer
00000	Ordnance Corps
03933	Armstrong Machine Works
08162	Bower Roller Bearing Division of Federal Mogul Corp.
08288	Military Supply Standards
09367	Allis-Chalmers Mfg. Co. Harvey Works
18265	Donaldson Co. Inc.
25567	Gorman Rupp Co.
33116	Kelsey-Hayes Co.
36251	Lincoln Engineering, Div of McNeil Machine and Engineering Co.
60038	Timken Roller Bearing Co.
61463	United States Rubber Co.
66289	Wisconsin Motor Corp.
70955	Blackstone Mfg. Co.
73370	Fram Corp.
74410	Holland Hitch Co.
78252	Stolper Industries Inc.
78480	Tillotson Mfg. Co.
79470	Weatherhead Co. The
81336	Chief of Engineers
81718	OPW Division of Dover Corp.
82796	Fairbanks Morse and Co. Beloit Works Division.
96152	Marvel-Schebler Products Division of Borg-Warner Corp.
96906	Military Standards Promulgated by Standardization Division Directorate of Logistic Services DSA

## 8. Report of Equipment Publication Improvements

Report of errors, omissions, and recommendations for improving this publication by the individual user is encouraged. Reports should be

submitted on a DA Form 2028 (Recommended Changes to DA Publications) and forwarded direct to the Commanding General, U.S. Army Mobility Equipment Command, ATTN: AMS-ME-MPP, 4300 Goodfellow Boulevard, St. Louis, Missouri 63120.
